

GISERA Communiqué

National Management Committee Meeting #4
2 December 2016

The GISERA National Research Management Committee held its fourth meeting on 2 December 2016 via telephone.

Overall, GISERA has committed \$16.6 M to ongoing research projects and the 28 research projects are an average of 77% completed.

The GISERA Director noted that there had been 43 engagements during the latest quarter, bringing the total engagement since GISERA's commencement to 689.

The National Research Management Committee discussed the composition and role of the National Advisory Committee and agreed that this group could meet annually at a stakeholder roundtable.

It was noted that the NSW RRAC approved four new projects, including three water-released projects, one on CSG well decommissioning, and a fifth to develop a health impacts scoping study, would require QLD RRAC approval as it will be jointly funded.

The NRMC agreed that the Annual Research and Development Plan and Budget 2016/17 would be made available for public viewing on the GISERA website.
